## DETAILED ACTION

### ***Information Disclosure Statement***

The IDS filed 9/26/2003 has been considered and placed of record. An initialed copy is attached herewith.

### ***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishimura et al. (US 6,313,546). The reference discloses a power supply assembly for a vehicle having, *inter alia*, a high and a low voltage bus (10, 11), a dc converter (12), contactors (8, 14), high voltage cells (15) and low voltage cells (16). During start-up,

Art Unit: 2838

energy is transferred from the high voltage bus to the low voltage bus thru the converter. High voltage cells and low voltage cells are being recharged during pre-charging of the buses. See column 3, line 15 to column 4, line 50. Switches (8, 14) or contactors are used to isolate the buses. See column 4, lines 60-65. See figure 2.
